

Avena fatua

Bromus mollis

*Bromus
hordeaceus*

Bromus hordeaceus

Lapsana communis

Plantago major

Geranium dissectum

Phleum pratense

Rumex crispus

Tripleurospermum perforatum

Alopecurus myosuroides

Myosotis arvensis

Taraxacum officinale

The image shows three individual seeds of Viola tricolor. Each seed is dark brown, almost black, and has an elongated, slightly curved shape. They are positioned on a light-colored, textured surface. The seed in the top left is oriented vertically. The seed in the top right is oriented horizontally. The seed in the bottom left is oriented diagonally. The text 'Viola tricolor' is centered in the lower half of the image.

Viola tricolor
